DETAILED ACTION

Claim Objections

1. Claims 22 and 23 are objected to because of the following informalities:

in claim 22, line 2, substitute “and/or” with --or--; and

in claim 23, line 3, substitute “and/or” with --or--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 5-11, and 13-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Castleman et al. (US 5,508,691) (hereinafter referred to as ‘Castleman’).

Castleman teaches an electronic module 110, 210 that is held within a lock. The electronic module 110, 210 in the lock reads a code number from a ROM in an electronic key 120, 220 and stores the code number in a RAM inside the electronics module 110, 210. The electronic module 110, 210 alternates the control state of the lock between open and closed conditions by controlling the power system. The lock may be applied toward dangerous, heavy machinery and the maintenance of safety equipment particularly where interruption of service of the equipment is required for maintenance.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castleman in view of Mabuchi et al. (US 6,417,760) (hereinafter referred to as 'Mabuchi').

Castleman lacks the teaching of a display to present information.

Mabuchi teaches an inspection system wherein an inspection display unit 6 reads out the inspection information stored in an inspection information file 5 (col. 16, lines 41-45).

One of ordinary skill in the art would have readily recognized that displaying pertinent information about dangerous equipment on a display would have been beneficial for possibly giving an observer insight as to the important operations and functions of the equipment. Therefore, it would have been obvious, at the time the invention was made, to modify the teachings of Castleman with the aforementioned teaching of Mabuchi.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

McCain et al. (US 5,309,351) teach a communications, information, maintenance diagnostic and training system.
